

QUARRY FARM, PHASE 3

The site, which extends from Worset Lane in the north to Elwick Road in the south, will accommodate a low density, landscape-led development which will comprise circa 475 new two, three and four bedroom homes, the final mix of which to be decided in close consultation between Hartlepool Borough Council and the chosen builder. The scheme will also look to provide a policy compliant 18% affordable housing on site with mix/tenure to address local need.

The scheme will also create a new local centre with business incubator facilities designed specifically for local start-up business ventures together with retail facilities.
